

# PAINE'S CELERY COMPOUND

## SPRING TIRED.

R. G. Blydenburgh, 2 Union St.,  
Hartford, Conn., writes:

"I have to work very hard and every spring finds me with a lame back and a general weak, tired feeling. Through the advice of my druggist, I used Paine's Celery Compound. My back was soon well and I felt as strong and vigorous as ever. The last five years I have taken two or three bottles of Paine's Celery Compound every spring, and it puts me in shape for hard work and I feel much younger."

**PAINE'S CELERY COMPOUND** has great virtue, and, especially in spring time, is the home remedy of the American people. It is a medicine compounded to nourish and strengthen the delicate nerve fibres, to sustain strong heart action, and keep the stomach, liver and kidneys in vigorous health.

In the spring the constant strain of work and the severe climatic changes wear the human system, the nerves are weakened and inflamed, broken sleep does not overcome exhaustion, and the slow circulation of the blood, the tired stomach, liver and kidneys cause the body to suffer lassitude and pain.
